

Summary for the Week of October 20: Class Schedule Project

Status Report:

We completed work on our project specifications. We spent the week talking about project verifications and are preparing to make verification steps for our project. We had a guest speaker, Hab, come in on Friday to talk about software engineering in the “real world” - ACU. He spoke on many aspect of professional software engineering, including the pros and cons of specific methodologies, and how software engineering has a large “people” component.

Completed:

Project specifications

To-Do:

Project verifications
